

■ UrbanKart – MERN Stack E-Commerce Website

UrbanKart is a fully functional E-Commerce web application built using the MERN Stack (MongoDB, Express.js, React, Node.js). It provides users with a smooth and secure online shopping experience, along with an Admin Dashboard for managing products, users, and orders efficiently. The project includes role-based authentication, secure payments, and real-time updates, offering an end-to-end e-commerce solution similar to modern online stores.

■■ Key Features

- 1 ■■■ User Authentication using JWT and Google OAuth for secure login/registration.
- 2 ■■ Product Management: Browse, search, filter, add, update, and delete products.
- 3 ■ Payment Integration: Razorpay Payment Gateway for secure transactions.
- 4 ■ Order Management: Real-time tracking and admin status updates.
- 5 ■ Admin Dashboard: Manage users, products, and orders with analytics overview.
- 6 ■ Fully Responsive Design using React, Tailwind CSS, and Bootstrap.

■ Tech Stack

Frontend: React.js, HTML, CSS, JavaScript, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB (Mongoose ODM)

Authentication: JWT & Google OAuth 2.0

Payment Gateway: Razorpay Integration

Tools: Git, GitHub, Postman, Render

■ Highlights

- 1 Integrated Razorpay payment gateway for secure online transactions.
- 2 Designed a clean and intuitive UI for a modern shopping experience.
- 3 Implemented full CRUD operations and role-based admin management.
- 4 Deployed using Render and MongoDB Atlas for hosting and database.
